SKILLS SUMMARY

Languages:	Java, JavaScript, HTML+ CSS, SQL
Frameworks:	NodeJS, ReactJS, NextJS, Spring Boot
Tools/Platforms:	MySQL, MongoDB, Oracle SQL, PostgreSQL
DevOps:	Docker, Git/GitHub, Jenkins
Technical Foundations:	Algorithms and Data Structures, Object-Oriented Design, Operating Systems, Networking

WORK EXPERIENCE

Software Engineer – Thinkers Klub *React.js | Next.js | Node.js | MongoDB | Express.js* Nov' 2025 – Present

- Built **3 responsive web apps** with **React.js** and **Next.js**, boosting user retention by **25%**.
- Collaborated in a **5-member team** to add **20+ features** and refactor code, cutting bugs by **15%**.
- Performed **performance audits** and optimized rendering, reducing load time by **30%** across browsers.
- Set up **CI/CD pipelines**, cutting deployment time by **40%** and enhancing team productivity.

OUTLIER AI Trainer Contingent *Nov' 2024 – Oct' 2025*

- Trained AI models across **3+ domains**, including programming, analytical reasoning, and related fields, enhancing accuracy by **20%**.
- Assessed **1000+** responses from AI engines and peer reviewers, ensuring **95%+** response quality.
- Debugged and optimized AI-generated responses, improving efficiency and correctness by **30%**.

PROJECTS

DevPilot – AI GitHub Chat Platform (RAG) [Link] *Java, Spring Boot, Next.js, PostgreSQL, pgvector, OpenAI API* Aug'26

- Architected a full-stack RAG (Retrieval-Augmented Generation) platform using Java, Spring Boot, Spring Security (OAuth2), and Next.js/TypeScript, enabling secure GitHub login and natural-language querying of any connected repository's codebase.
- Built an asynchronous indexing pipeline (Spring Async) that fetches, chunks, and embeds source code via the OpenAI Embeddings API, storing vectors in PostgreSQL with pgvector for fast semantic similarity search across large codebases.
- Implemented a context-aware chat engine with Spring AI, retrieving top-K relevant code chunks per query and streaming LLM responses in real time via Server-Sent Events (SSE) with inline file/line citations.

AI-Enhanced Educational Platform [Link] *MERN | TypeScript | Socket.io | Gemini LLM | LangChain | VectorDB* Jan'2026

- Architected and deployed a full-stack educational platform supporting course purchasing and real-time live classes via Socket.io, sustaining 500+ concurrent active users with 99.8% uptime.
- Integrated an AI-powered doubt resolution system leveraging Google Gemini LLM and a LangChain RAG pipeline, reducing average query response time from 5 minutes to under 30 seconds — a 90%+ latency improvement.
- Engineered a VectorDB-backed semantic search engine over course materials, achieving a 65% improvement in answer relevance and cutting instructor intervention workload by 40%.
- Built a fully responsive frontend using TypeScript and Tailwind CSS, and integrated a secure payment gateway with automated enrollment flows and real-time user progress tracking.

Real-Time Chat Application [Link] *Node.js | Socket.IO | MongoDB | React.js | Cloudinary | Nodemailer* Oct' 2025

- Engineered a full-stack real-time chat application handling 100+ concurrent users with zero downtime during peak traffic loads.
- Optimized WebSocket communication using Socket.IO, achieving a 60% reduction in message delivery latency through efficient event handling and connection management.
- Implemented real-time user presence indicators and message read receipts, improving user experience metrics by 25% and significantly enhancing conversational flow.

CERTIFICATIONS

• AI Agents With MongoDB MongoDB	Aug 2026
• Databases for Developers: Foundations (Oracle SQL & Database Concepts) Oracle Dev Gym	July 2026
• Data Analyst - SAP Analytics Cloud SAP	Mar 2026
• Cloud Computing NPTEL	Dec 2024
• Generative AI with LLM, Advanced Data Analysis Coursera	May 2023

ACHIEVEMENTS

- Coordinated and managed multiple events like Hackathon as a member of the Untangle Club
- Secured 3rd position in a university-level hackathon for building a full-stack solution under time-bound problem constraints.
- Solved 500+ DSA problems, sharpening problem-solving speed and coding accuracy.
- Built and deployed 5+ client websites end-to-end, managing server configuration, deployment, and uptime to ensure reliable production performance.

EDUCATION

Lovely Professional University
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.63**
Minor-Full Stack Developer

Phagwara, Punjab
August 2022 – August 2026
